Cam phaser knock on 4.6/5.4L 3V engines is common in older models and can lead to bigger problems if not fixed. There are millions of trucks on the road with this problem, but until now, there have been few good options to permanently help fix the knock. This kit helps to eliminate any knocking noise heard from the front valve cover/timing cover related to the phasers. These all-in-one kits correct the cam phaser knock on ONE engine.
