HAVE YOU CHECKED YOUR BELTS LATELY?

DON'T JUST LOOK FOR CRACKS...

Rubber wear is the leading indicator that it's time to change your belt. Today's belts resist cracking because of the increased elasticity, and tend to wear in a fashion similar to a tire.

New Belt: "V" Profile

Worn Belt: "U" Profile

- Today's belts experience material loss over time and wear like a tire
- This type of wear increases the space between the ribs causing the belt to slip
- Slippage results in improper engine cooling, which can lead to some costly repairs
