RESTORE OE DRIVEABILITY WITH

Duralast
PROVEN TOUGH™

STEERING COMPONENTS: PUMPS, GEARS AND RACKS

- Every pump, gear and rack is 100% performance tested to ensure smooth, leak-free operation and proper pressure flow
- Pressure decay tested to prevent leakage
- Calibrated for proper valve balance and equal turning assistance in both directions

DID YOU KNOW?

- Fluid contamination is the #1 cause of failure in a power steering system. Proper system flushing and use of in-line filters will reduce comebacks
- Most power steering pump noise is caused by air in the system

OE GRADE CLUTCH & PRESSURE PLATE

- Precision matched and tested kit components to provide outstanding performance and durability
- Premium friction to ensure original equipment performance

CONTROL ARMS

Replacing ball joints can be time consuming and costly. Save time, save money and replace the whole assembly instead!

- Check for excessive play in the ball joint, as well as torn boots. Torn boots are an indicator of potential failure and should be replaced
- Duralast control arms are designed with advanced polymer bearings to provide ultra-low friction and long life

Ball Joints

BALL JOINTS & TIE ROD ENDS

- Forged micro-alloy steel construction
- Polished ball stud and low-friction polymer bearing combine to provide "like-new" steering
- Molded elastomer boots to provide sealed, contaminant-free assemblies

Tie Rod Ends
